PROFESSIONAL SUMMARY

Computer Science undergraduate at NSBM Green University with hands-on experience developing full-stack web and mobile applications using Java, Spring Boot, React, Next.js, TypeScript, PostgreSQL, MySQL, Flutter and Firebase. Built authentication and authorization workflows, RESTful APIs, database-backed features, responsive interfaces, and security controls across individual and team projects. Experienced in team leadership, Git/GitHub collaboration, software architecture, and application integration. Seeking a Software Engineering or Full Stack Development internship where I can contribute to production-oriented software projects and grow as a software engineer.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, PHP, Dart, SQL, HTML5, CSS3

Frontend & Mobile: React, Next.js, Tailwind CSS, Bootstrap 5, Flutter, Responsive UI, Canvas API, Web Audio API

Backend & APIs: Spring Boot, ASP.NET Core, RESTful APIs, JWT, Node.js/Next.js API Routes, Prisma ORM, Entity Framework Core, Validation

Databases: PostgreSQL, MySQL, Cloud Firestore, SQL

Security: Authentication & Authorization, Role-Based Access Control (RBAC), JWT, CSRF Protection, Password Hashing, Secure Token Handling

Architecture & Engineering: OOP, Clean Architecture, MVC, Repository Pattern, Dependency Injection, CRUD, Database Design, Modular Architecture

Testing & Tools: MockMvc, xUnit, Moq, FluentAssertions, Git, GitHub, Postman, Swagger/OpenAPI, Docker, VS Code, IntelliJ IDEA, Figma

Cloud & Services: Firebase Authentication, Cloud Firestore, UploadThing, AWS (training/certification)

EDUCATION

NSBM Green University | BSc (Hons) in Computer Science | 2025 - 2028

Sri Lanka | Expected Graduation: 2028

Relevant Coursework: Object-Oriented Programming with Java, Database Systems, Data Structures & Algorithms, Web Application Development, Development of Enterprise Applications, Systems Analysis & Design, Cybersecurity Fundamentals

G.C.E. Advanced Level - Physical Science | 3 C Passes

Combined Mathematics, Physics, Chemistry | Badulla Central College

SELECTED PROJECTS

CampusX - Student Marketplace & Dorm Discovery Platform | Solo Project

Next.js 15 | React 19 | TypeScript | Tailwind CSS | Prisma | PostgreSQL | JWT | UploadThing

- Developed a full-stack student marketplace and dorm discovery platform with listing, accommodation, messaging, notifications, reporting, and saved-item workflows.
- Implemented secure authentication using Zod validation, bcrypt password hashing, JWTs, HttpOnly cookies, protected routes, and role-based/admin access controls.
- Designed relational PostgreSQL data models with Prisma and built search, filtering, pagination, image uploads, ownership checks, and user-to-user messaging workflows.

TalentFlowOS - Talent Management & Recruitment Platform | Team Leader | Authentication, System Integration & Infrastructure

.NET 8 | ASP.NET Core | C# | React 19 | TypeScript | EF Core | PostgreSQL | JWT | Swagger

- Led a team project delivering a multi-role recruitment platform for candidates, recruiters, hiring managers, and administrators.
- Implemented registration, login, email verification, forgot/reset password, JWT claims, BCrypt password hashing, role-based authorization, and protected API workflows.
- Integrated application layers using dependency injection, EF Core/PostgreSQL, middleware, CORS, Swagger/OpenAPI, and automated testing support.

CropFlow - Agricultural Supply-Chain Platform | Solo Project

Java 21 | Spring Boot | Spring Security | PostgreSQL | JPA | Flyway | JWT | Docker

- Designed a modular supply-chain backend connecting farmers, buyers, and transporters through marketplace and order-oriented workflows.
- Implemented JWT authentication with short-lived access tokens, rotating hashed refresh tokens in HttpOnly cookies, Argon2 password hashing, CSRF protection, email verification, password reset, and RBAC.
- Built marketplace listing workflows with ownership authorization, validation, state transitions, search, pagination, sorting, and integration tests using MockMvc.

SELECTED PROJECTS - CONTINUED

PetCare+ - Smart Pet Health, Veterinary Care & Adoption App | Team Leader

Flutter | Dart | Firebase Authentication | Cloud Firestore | Clean Architecture

- Led development and feature integration for a multi-role mobile application connecting pet owners, veterinary staff, and adoption providers.
- Implemented email/password and Google authentication, password reset, onboarding/navigation, Firestore owner profiles, and role-aware security rules.
- Developed notification and pet-adoption workflows using Firestore streams, batch read updates, repository abstractions, ownership controls, and widget testing.

Task Management System - Full Stack Enterprise Web Application | Team Leader | Authentication & Security

Java 17 | Spring Boot | Spring Security | React 19 | MySQL | JWT | Axios | Bootstrap

- Led a six-member academic development team and integrated a full-stack task management platform with secure authentication, task workflows, search/filtering, and administrative analytics.
- Implemented JWT-based authentication and authorization using Spring Security, a custom JWT filter, BCrypt, protected API routes, role-based access, and authentication state management in React.
- Developed login and registration interfaces, integrated frontend authentication with REST APIs, and collaborated through Git/GitHub feature branches, merges, debugging, and integration.

Sentinel Defense - Browser Tower Defense Game | Solo Project

JavaScript (ES6+) | HTML5 Canvas | CSS3 | Web Audio API | LocalStorage

- Built a modular browser tower-defense game with a requestAnimationFrame game loop, progressive waves, multiple tower/enemy types, targeting modes, projectiles, collision/damage logic, and game-state transitions.
- Implemented homing, ballistic, area-of-effect and instant-hit projectile behaviors, status effects, visual feedback, synthesized audio, and reusable game-system modules.
- Added persistent save/load with structure and checksum validation and responsive layouts for desktop, tablet, and mobile screens.

Spotify Mobile App - Spotify-Inspired Mobile UI | Solo Flutter Project

Flutter | Dart | Material UI | flutter_svg

- Developed a Spotify-inspired mobile interface using Flutter, including splash, onboarding/get-started, and theme-selection screens.
- Built reusable UI components and centralized light/dark theme, color, typography, and asset configuration for consistent presentation.
- Structured the application into presentation, common widget, and core configuration layers to support maintainable feature development.

CERTIFICATIONS & TRAINING

- AWS Cloud Practitioner Essential - Simplilearn SkillUp (Apr 2026)
- Getting Started with DevOps on AWS - AWS (Jun 2026)
- Customizing and Evaluating LLMs Using Amazon SageMaker JumpStart - AWS (Jun 2026)
- Introduction to MongoDB - Simplilearn SkillUp (May 2026)
- Agile Scrum Master - Simplilearn SkillUp (May 2026)
- AI Fluency: Framework & Foundations - Anthropic (May 2026)
- Claude 101 - Anthropic (Apr 2026)
- Claude Code 101 - Anthropic (Apr 2026)
- Siemens Mobility - Project Manager Job Simulation - Forage (Jun 2026)
- EF SET English Certificate - C1 Advanced (Apr 2026)

LEADERSHIP & COLLABORATION

- Team Leader for TalentFlowOS, coordinating authentication, system integration, infrastructure work, task allocation, and feature integration.
- Team Leader for Task Management System, coordinating a six-member development team and Git/GitHub collaboration across authentication and frontend integration work.
- Team Leader for PetCare+, coordinating feature integration and Git/GitHub workflows across authentication, notifications, adoption, and application navigation.
